

50+ PROJECT DEFINITIONS DATA ANALYTICS

Project Priority

No.	Project Title	Definition
1	Retail Sales Analytics	Analyze sales transactions, customer purchasing behavior, and product performance to improve revenue and profitability.
2	E-Commerce Analytics	Study online customer behavior, product demand, reviews, and purchasing trends to optimize business performance.
3	Supply Chain Analytics	Analyze inventory, procurement, warehousing, and logistics operations to improve supply chain efficiency.
4	Logistics Performance Analytics	Evaluate shipment tracking, delivery times, transportation costs, and route efficiency.
5	Banking Customer Analytics	Analyze customer transactions, account activity, and financial behavior to improve banking services.
6	Loan Risk Analytics	Assess loan applicants and repayment history to identify potential default risks.
7	Insurance Claim Analytics	Analyze insurance claims, fraud patterns, and customer profiles to improve claim management.
8	Financial Performance Analytics	Evaluate company revenues, expenses, profit margins, and investment performance for strategic decisions.
9	Stock Market Analytics	Analyze stock prices, trading volumes, and market trends to identify investment opportunities.
10	Healthcare Analytics	Analyze patient records, treatments, hospital performance, and healthcare outcomes to improve services.
11	Hospital Management Analytics	Evaluate patient flow, bed occupancy, treatment efficiency, and operational performance.
12	Pharmaceutical Sales Analytics	Analyze medicine sales, distribution channels, and product demand trends.
13	HR Analytics	Analyze employee performance, attendance, recruitment, and workforce productivity.
14	Employee Attrition Analytics	Identify factors contributing to employee turnover and recommend retention strategies.
15	Recruitment Analytics	Analyze hiring processes, candidate sourcing, and recruitment effectiveness.
16	Education Analytics	Analyze student performance, attendance, assessments, and academic progress.
17	University Admission Analytics	Study admission trends, applicant demographics, and enrollment patterns.
18	Student Placement Analytics	Analyze placement performance, skill development, and recruitment outcomes.

19	Crime Analytics	Analyze crime incidents, locations, offender patterns, and law enforcement effectiveness.
20	Cyber Crime Analytics	Study cyber attacks, vulnerabilities, threat trends, and security incidents.
21	Social Media Analytics	Analyze engagement metrics, audience behavior, and content performance across social platforms.
22	Digital Marketing Analytics	Evaluate campaign effectiveness, conversion rates, website traffic, and customer acquisition.
23	Customer Segmentation Analytics	Group customers based on behavior, demographics, and purchasing patterns for targeted marketing.
24	Customer Churn Analytics	Identify customers likely to leave a service and recommend retention strategies.
25	Telecommunications Analytics	Analyze customer usage, network performance, and service quality metrics.
26	Manufacturing Analytics	Evaluate production efficiency, machine utilization, defects, and operational performance.
27	Quality Control Analytics	Analyze defect rates, inspection reports, and product quality metrics to improve standards.
28	Predictive Maintenance Analytics	Use equipment and maintenance data to predict machine failures before they occur.
29	Agriculture Analytics	Analyze crop yields, weather conditions, soil quality, and farming efficiency.
30	Smart Farming Analytics	Use sensor and environmental data to optimize agricultural productivity.
31	Real Estate Analytics	Analyze property prices, market trends, customer demand, and investment opportunities.
32	Hotel Management Analytics	Evaluate occupancy rates, bookings, customer satisfaction, and hotel revenue.
33	Tourism Analytics	Analyze tourist behavior, travel patterns, and destination performance.
34	Airline Operations Analytics	Evaluate flight schedules, delays, passenger traffic, and operational efficiency.
35	Airport Analytics	Analyze passenger movement, baggage handling, flight operations, and airport performance.
36	Energy Consumption Analytics	Analyze electricity usage patterns and identify opportunities for energy optimization.
37	Renewable Energy Analytics	Evaluate solar, wind, and renewable energy production efficiency and sustainability metrics.
38	Environmental Analytics	Analyze pollution levels, climate data, and environmental impact indicators.
39	Water Resource Analytics	Study water consumption, distribution, and conservation effectiveness.
40	Government Policy Analytics	Analyze public service delivery, citizen engagement, and policy effectiveness.
41	Public Transportation Analytics	Evaluate passenger demand, route utilization, and transportation efficiency.
42	Smart City Analytics	Analyze urban infrastructure, traffic, utilities, and public services for city optimization.
43	Traffic Analytics	Study traffic patterns, congestion levels, accidents, and road utilization.

44	Sports Performance Analytics	Analyze player statistics, team performance, and match outcomes.
45	Fitness Analytics	Evaluate workout performance, health metrics, and fitness progress.
46	Food Delivery Analytics	Analyze order trends, delivery performance, customer satisfaction, and restaurant efficiency.
47	Restaurant Analytics	Evaluate menu performance, customer preferences, and operational profitability.
48	Inventory Analytics	Analyze stock levels, inventory turnover, and replenishment strategies.
49	Procurement Analytics	Evaluate supplier performance, purchase trends, and procurement costs.
50	Vendor Performance Analytics	Analyze supplier reliability, quality, and delivery effectiveness.
